

TEAM PENSKE – INDYCAR | GETTING AN EDGE IN RACING

End-Use Part

“ Racing engineers are always trying to get another tenth of a second. With 3D printing, it improves the cycle of part development ”

Team Penske, an American pro racing team, one of the most successful INDYCAR racing teams.

CHALLENGE

Current fueling line used during pit stops was too heavy, slowing down the refueling pit stop

SOLUTION

Stratasys FDM Nylon 12CF printed refueling tool

BENEFITS

- **Reduced weight** of refueling hose handle
- Able to refuel cars with **greater speed and ease**
- **Reduced tools** needed to service the car

**TEAM
PENSKE**
